

Federico Upegui Restrepo

Node.js Backend & DevOps Developer

Medellín, Antioquia, Colombia · federico_upegui.dev@outlook.com

federico.is-a.dev · linkedin.com/in/federico-upegui · github.com/Thefederico

Profile

JavaScript developer with 4+ years of experience, specialized in Node.js backend development and DevOps practices. I design and build REST and GraphQL APIs, microservice architectures and CI/CD pipelines, with AWS deployments and Docker containers. Strong interest in web security, observability and process automation with n8n and AI.

Experience

Node.js Backend & DevOps Developer — Scalboost

July 2024 – present · Medellín, Colombia

- Backend service development with Node.js and TypeScript.
- AWS cloud infrastructure: deployments, Docker containers and CI/CD pipelines.
- Observability and monitoring of production services.
- Process automation with n8n and AI integrations.

FullStack JavaScript Developer — One Consultants SAS

September 2022 – March 2024 · Medellín, Colombia

- Built REST and GraphQL APIs with Node.js, NestJS and Apollo Server.
- Developed UIs with React and Angular (SPA and SSR).
- ORM integration, authentication and web security; automated testing.
- Delivery cycles managed with Azure DevOps and CI/CD.

Full stack web developer — e-manager

March 2022 – August 2022

- Developed and maintained full stack web applications with JavaScript.

Software development intern — Grupo Éxito

August 2021 – February 2022 · Envigado, Colombia

- Supported the software development team at one of Colombia's largest retail companies.

Web developer — Freelance

February 2021 – August 2021 · Medellín, Colombia

- Web solutions to give local businesses an online presence.
